

Maths Enrichment Week – Maths is all around us 8th – 12th November 2021

Our theme for Maths Enrichment this week has been 'Maths is all around us'. Part of our vision when teaching Maths at Aston Rowant is that children realise that Maths really is all around us, and most importantly, that they recognise the role it plays in so many jobs and everyday activities. Each day, across the school, we have looked at maths in a different way.

On Monday, each class looked at a different story book with links to Maths. KS2 also took part in an online 'Magic Maths' workshop. Tuesday saw us explore how artists use maths within their artwork. Later in the week we all then looked at the careers of some famous faces and how they use need to be able to use maths for their job. We also took part in a Maths Roadshow where each class had the opportunity to carry out a range of problem-solving activities. Miss Williams then concluded the week by investigating maths through Forest Friday.

Maths is all around us at home too! – Photos Please!!

To help us show the children that maths truly is all around us we would like your help! When you are at home or out and about, look out for the maths you see or do. Mrs Olsen would like to create a maths display to celebrate the maths we all do, so please take a photograph and send it in to the school office. Title your email with 'I used maths to'. It could be you used maths to make cake; to work out how much your shopping was; to know how long it was until bedtime; or to know how fast Mummy was driving!
