

Aston Rowant C+E Primary School

Growing together we inspire each other to achieve our full potential as courageous life long learners.

Science Growth at Aston Rowant C+E Primary School 2021-2022

The goal of education in Aston Rowant C+E Primary School is to enable our children be **curious** in their approach to learning, to be **courageous** in their attitude to learning, to be empowered to work both **independently** and **collaboratively**, to understand the impact their learning has had on them so far and be inspired to **keep learning**.

	Hedgehog (R)	Squirrel (1/2)	Fox (3/4)	Owl (5/6)
What do we teach?	<p style="text-align: center;">Understanding the World</p> <p>Discovery and learning related to EYFS topics takes place throughout the year.</p>	<p>Autumn Term: Seasonal Changes (Autumn/Winter) Animals Including Humans (Year 2 NC)</p> <p>Spring Term: Seasonal Changes (Spring) Living things and their habitats</p> <p>Summer Term: Seasonal Changes (Summer) Plants</p>	<p>Autumn Term: Rocks, fossils and soils</p> <p>Spring Term: Light Animals Including Humans (Year 3 NC)</p> <p>Summer Term: Living things and their habitats</p>	<p>Autumn Term: Properties and Changes of Materials</p> <p>Spring Term: Electricity Light</p> <p>Summer Term: Evolution and Inheritance</p>
How do we teach?	<p>Child initiated, topic based learning rich with practical experiences and questions to encourage curious learning.</p>	<ul style="list-style-type: none"> • Enquiry/practical based units of study with 'I wonder...' pages at the beginning of each unit to encourage curious learning. • Tasks differentiated into Bronze, Silver and Gold to empower chn to choose the level. • Lessons are discussion based on discussion, scientific working and demonstration of knowledge and understanding of scientific concepts. • Lessons include pattern seeking, 	<ul style="list-style-type: none"> • Enquiry/practical based units of study with 'I wonder...' pages at the beginning of each unit to encourage curious learning. • Tasks differentiated into Bronze, Silver and Gold to empower chn to choose the level. • Lessons are discussion based on discussion, scientific working and demonstration of knowledge and understanding 	<ul style="list-style-type: none"> • Enquiry/practical based units of study with 'I wonder...' pages at the beginning of each unit to encourage curious learning. • Tasks differentiated into Bronze, Silver and Gold to empower chn to choose the level. • Lessons are discussion based on discussion, scientific working and understanding of scientific concepts. • Lessons include pattern seeking, observing over time, comparative

Assessment?	<p>EYFS Continually assessed by class teachers against framework/ELGs End of unit Twinkl assessments used may be used as summative assessments for Years 1-6 where teachers deem appropriate. Teachers input data against objectives taught into OTrack (online assessment tracker) to monitor attainment and progress. Over the course of the year there is: one formal lesson observation, one learning walk, one book look (one per term)</p>			
Intervention?				
Outcomes?	<p>Children know about similarities and differences in relation to places, objects, materials and living things. They talk about the features of their own immediate environment and how environments might vary from one another. They make observations of animals and plants and explain why some things occur, and talk about changes.</p>	<p>Autumn Term: Observe the changes across the four seasons; Observe and describe weather associated with the seasons and how the day length varies.</p> <p>Notice that animals, including humans, have offspring which grow into adults; Find out about and describe the basic needs of animals, including humans, for survival (water, food and air); Describe the importance for humans of exercise, eating the right amounts of different types of food and hygiene.</p> <p>Spring Term: Observe the changes across the four seasons; Observe and describe weather associated with the seasons and how the day length varies.</p> <p>Explore and compare the differences between things that are living, dead, and things that have never been alive; Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other; Identify and name a variety of plants and animals in their habitats, including micro-habitats; Describe how an animals obtain their food from plants</p>	<p>Autumn Term: Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties; Describe in simple terms how fossils are formed when things that have lived are trapped within rock; Recognise that soils are made from rocks and organic matter.</p> <p>Spring 1: Recognise that they need light in order to see things and that dark is the absence of light; Notice that light is reflected from surfaces; Recognise that light from the sun can be dangerous and that there are ways to protect their eyes; Recognise that shadows are formed when the light from a light source is blocked by a solid object; Find patterns in the way that the size of shadows change.</p> <p>Spring 2: Identify that animals, including humans, need the right types and right amount of nutrition, and that they cannot make their own food – they get nutrition from what they eat; Identify that humans and some other animals have skeletons and muscles for support,</p>	<p>Autumn Term: Compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets; Know that some materials will dissolve into liquid to form a solution, and describe how to recover a substance from a solution; Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating; Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic; Demonstrate that dissolving mixing and changes of state are reversible changes; Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda.</p> <p>Spring 1: Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit; Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches; Use recognised symbols when</p>

			predictions for new values, suggest improvements and raise further questions; Identifying differences similarities or changes related to simple scientific ideas and processes; Using straightforward scientific evidence to answer questions or to support their findings.	of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs; Using test results to make predictions to set up further comparative and fair tests; Reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations; Identifying scientific evidence that has been used to support or refute ideas or arguments.
Progression? See separate skills and knowledge progression document also.	<p>40-60+ months: Looks closely at similarities, differences, patterns and change.</p> <p>ELGs: Children know about similarities and differences in relation to places, objects, materials and living things. They talk about the features of their own immediate environment and how environments might vary from one another. They make observations of animals and plants and explain why some things occur, and talk about changes.</p> <p>Exceeding: Children know that the environment and living things are influenced by human activity. They can describe some actions which people in their own community do that help to maintain the area they live in. They know the properties of some materials and can suggest some of the purposes they are used for. They are familiar with basic scientific concepts such as floating, sinking and experimentation.</p>	<p>Vocabulary (Green indicates new vocabulary for the year group):</p> <p>Seasonal Changes: Summer winter autumn spring day daytime wind rain snow hail sleet fog sun hot warm cold</p> <p>Plants: Year 1: Common wild plants garden plants deciduous evergreen tree trunk branches leaf/leaves root bud flowers blossom petals stem fruit vegetables bulb seed</p> <p>Year 2: Common wild plants garden plants deciduous evergreen tree trunk branches leaf/leaves root bud flowers blossom petals stem fruit vegetables bulb seed water light suitable temperature grow healthy germination reproduction</p> <p>Living Things and their Habitats: living dead never alive habitats</p>	<p>Vocabulary (Green indicates new vocabulary for the year group):</p> <p>Rocks, fossils and soils: appearance physical properties hard/soft shiny/dull rough/smooth absorbent/not absorbent fossils sedimentary rock soils organic matter buildings buildings gravestones grains crystals</p> <p>Light: light see dark reflect surface natural star Sun Moon shadow blocked solid artificial torch candle lamp sunlight dangerous protect eyes</p> <p>Animals Including Humans: nutrition nutrients carbohydrates protein fats fibre water vitamins minerals skeleton bones joints endoskeleton exoskeleton hydrostatic skeleton vertebrate invertebrate contract relax</p>	<p>Vocabulary (Green indicates new vocabulary for the year group):</p> <p>Properties and changes of materials: properties hardness solubility transparency electrical conductor thermal conductor response to magnets dissolve solution separate separating solids liquids gases evaporating reversible change mixing filtering sieving melting irreversible changes burning rusting magnetism electricity chemists conductivity insulator</p> <p>Electricity: voltage brightness volume switches danger series circuit electrical safety sign circuit diagram switch bulb buzzer motor symbols</p> <p>Light: light travels straight reflect reflection light source object</p>
