

Fox Class Spring 1

This half term's open-ended task is focussed on our History topic of the ancient Maya civilisation and our Science topic of movement and nutrition

Choose one of these ideas or you may have something else you'd like to do. Bring your completed project in on the week commencing 9th February when we will share what we have made to the class.

Suggestions:

- Could you make an iMotion film about some aspect of the Mayan civilisation?
- Create your own Mayan temple!
- Find out about Mayan glyph writing. Can you have a go? Maybe use clay to make some!
- Can you research the Mayan number system. Why not make a poster explaining how it worked. Maybe make some maths questions (and answers!) for the class!
- Can you make a moving skeleton?
- Design a nutritious meal, make it, eat it then write a review about it. Maybe include photos?
- Create a fitness workout for the class!
- Make a food and fitness wordsearch.

If you can think of anything more exciting that demonstrates your learning at home, then I would be thrilled to see it! 😊
